SUMMARY

Josh is a dynamic business leader with 10+ years of experience in Civil Engineering. His dual roles as a Civil Engineer and Head of Business at Rennacker Studio demonstrate his ability to balance technical expertise with business acumen. As a Civil Engineer, Josh thrives in major economic development projects that bring billions of dollars to the Phoenix area. As a Head of Business, he takes on a broader role focused on business development, client management, and overall studio leadership; ensuring clients goals are met within the project's scope and budget.

WORK EXPERIENCE

01/2018 – Present **Rennacker Studio**
Co-Founder & Head of Business
Serves as the primary liaison with clients and collaborates with the creative team on account growth strategies. Responsible for managing customer relationships, preparing marketing plans and campaigns, overseeing research studies, and proposing improvements for client marketing activities. Prepares proposals, project budgets, and cost management, ensuring projects align with scope and budget. Conducts frequent financial analysis, networks to acquire new clients, and fosters a collaborative and innovative work environment.

10/2018 – Present **City of Buckeye, Arizona**
Project Engineer
Review plans, conduct field visits, and ensure compliance with standards. Actively participate in private development and capital improvement projects while interpreting and enforcing engineering standards and policies, and managing project documentation. Coordinate with various stakeholders, communicating effectively, and resolving construction-related issues. Conducts engineering calculations and analyses, maintains technical data, and fosters effective working relationships.

05/2017 – 07/2018 **City of Rancho Cucamonga, California**
Assistant Engineer
Developed plans, specifications, and estimates for multiple Capital Improvement Projects. Ensured design compliance with CA MUTCD, Caltrans, and City standards. Coordinated between consultants, contractors, and multiple City departments through project phases. Completed design plans and construction within grant guidelines and timelines. Performed bid analysis to ensure compliance of contractor license, insurance, and bonds. Reviewed certified payroll reports for labor compliance with DIR specified labor classifications and compensation.

06/2013 – 05/2017 **City of Corona, California**
Engineering Intern – Capital Improvement Projects
Reviewed submittals, designed plans, collaborated with city departments and external agencies, pursued Community Development Block Grants, and assisted project managers.
